### **DETAILED ACTION**

Applicant's amendment dated 05/28/2008 has been received and entered. Claims 43-102 are pending in the application.

Applicant's arguments dated 05/28/2008 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 43-102 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's submitted prior art, Kondo et al., JP 7-261181, in view of Funada et al., JP 53-048542.

Regarding the above claims, Kondo et al. disclose a liquid crystal display (LCD) device (figures 1-3) comprising:

- . first and second substrate (7);
- . a liquid crystal layer containing liquid crystal molecules (5) with parallel field, in which the molecules are parallel with the surface of the first substrate in both case of off state (see figure 1c) and on state (see figure 1d);
- . a switching (thin film transistor);
- . a black matrix (2)

Art Unit: 2871

Kondo et al., however, do not disclose a transparent conductive material formed over the second substrate. Funada et al. does disclose a transparent conductive material (4) formed over the second substrate (see figure 7). Therefore, it would have been obvious to one skilled in the art at the time of the invention was made to employ the Kondo et al. display having an electrode over the upper substrate as shown by Funada et al in order to improve display characteristics and obtain an LCD with a fast response (see English Translation of JP-53-48542, page 5, line 11).

### *Conclusion*

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
